Key strengths:

Through my extensive experience in presentation design, I have gained valuable insights into the perspectives of both presenters and audiences.

I design and build presentations that work for both sides of the room. For presenters, I create intuitive PowerPoint templates with user guides that make delivery smooth and stress-free. For audiences, I turn bullet points into bold, engaging visuals that bring ideas to life and keep attention where it matters most.

Please feel free to get in touch to discuss your project, and how we might work together.
